### > CHEMICAL SUBSTANCES

The product covered by this PEP comply with REACH regulation and RoHS directive 2011/65/EU, 2015/863 et 201/2102.

### — Representativeness —

- > Data has been collected in October 2023 by our design team, then treated and analyzed in October 2023.
- > Data are related to the location of the production and assembly.
- > Data matches with previous technology and commercial references only.

## — Manufacturing —

The devices covered in this PEP are manufactured in France with production that has adopted an environmental management approach.

> **Energy model**

French mix; 2018

## — Distribution —

> Packaging is continuously improved by reducing the amount and using a maximum of recycled materials

> The unit pack has been modeled here. It is made up of:

- 100% recycled fiber paper instructions
- cardboard with a minimum of 50% recycled fibers

## — Installation —

> **Installation elements**

There is no element included in this phase.

> **Installation processes**

There is no installation process

> **Energy model**

Not applicable

> **Packaging End of life**

100% of cardboard, plastic and paper is landfilled

## — Use —

**For the considered scenario, the product has a power of 114W in active mode during 0.19% of the life cycle, and 0.372W during 99.81% of the life cycle. Measurement in accordance with NF EN 60335 and EN 50564.**

> **Energy model of the use phase:** European mix; 2018

> **Consumables and maintenance :** None

## — End of life —

> **Typical transport conditions**

Considering the complexity of the electric and electronic recycling channel and our lack of knowledge about the end-of-life processes implemented all around the world, we considered:

- 200 km of transport.
- A waste pretreatment of electrical and electronic equipment, including dismantling and material separation
- A waste incineration of electrical and electronic equipment.
- Loading rate of the truck going to the waste disposal center of 80%.

## — Environmental impacts —

Evaluation of the environmental impact covers the following life cycle stages: manufacturing, distribution, installation, use and end of life. All calculations are done with EIME software version EIME© v5.9.3 and CODDE 2022-01, on functional unit with following indicator set : Indicators for PEF EF 3.0 (Compliance: PEP ed.4, EN15804+A2) v2.0.
